termXact

*termXact for Flare turns checking terminology into collaborative terminology management.*

YOU USE MADCAP FLARE FOR YOUR TECHNICAL AUTHORING AND PUBLISHING? HERE IS THE GOOD NEWS: YOU CAN MAKE THIS POWERFUL TOOL EVEN MORE EFFICIENT. WITH TERMXACT FOR FLARE.

termXact for Flare allows you to check your terminology while creating your content. And what is more: You can work on your corporate terminology management at the same time – collaboratively and online.

CONVENIENCE IS THE KEY

termXact for Flare is very **convenient to work with.** Check your terminology right in your editor – topics, snippets, or complete folders. Select your languages and your highlight colors. Choose between various check modes. Access your hit list in the results pane. Use the Find and Replace dialog for even more comfortable handling.

WORKING MEANS COMMUNICATING

With termXact for Flare this is definitely true. termXact for Flare offers various **collaborative functions.** You can send e-mails to your terminology team, switch directly to your terminology data base, include your terminology manual in the termXact menu bar, or create a quick link to an Intranet landing page.

THE PACKAGE MAKES THE DIFFERENCE

You are pioneering terminology management in your company? Great. Here is our deal for you: Get termXact for Flare and **termXact Desktop Checker** in a package. termxact Desktop Checker allows you to paste and check text copied to the clipboard in a single step – no matter what editor or program you are using.

THERE ARE ALWAYS MORE OPTIONS

You are serious about terminology management? Go for it. termXact is also available for Microsoft Word, Excel and PowerPoint, Adobe InDesign and FrameMaker, Visual Studio and many other editors. And **tbxConnect** converts your terminology data into various formats, making it available to your different internal and external systems. We are happy to prepare an offer tailored to your needs.
